

PRESS RELEASE

Anavyssos, 07/06/2022,

Flowtech scientific poster publication at the 4th Congress of Geographical Information Systems and Spatial Analysis in Agriculture and Environment (May 24 - 26, 2022, Agricultural University of Athens)

Flowtech research team published a new scientific poster in the [4th Congress of Geographical Information Systems and Spatial Analysis in Agriculture and Environment](#) that took place on May 24 - 26, 2022, at the Conference Center of Agricultural University of Athens. The poster titled **"*Delimitation of River Segment for the Assessment of Ecological Flow*"** demonstrated a methodology for the definition of potential study areas and the delimitation of representative river sections. The methodology included GIS analysis and the use of satellite and airborne imagery data.

The FlowTech project is funded under the 2st Call for Research Projects ELIDEK (HFRI, Hellenic Foundation for Research and Innovation) for the support of Post-doctoral Researchers by the General Secretariat of Research and Technology (GSRT) within the scientific research area for the Environment and Energy (Project ID: 454).

Hellenic Center For Marine Research, 46.7 km Athens-Sounio ave., P.O.Box 712, P.C. 19013, Anavyssos, Greece.
